

Sports & Padel Halls

Space solutions for clubs & communities

LOSBERGER DE BOER

Modular Construction

A game-changer for sports facilities

Modular construction offers a swift, adaptable solution for building sports and padel halls, distinguishing itself as a viable option in today's fast-paced world. As pioneers in modular construction, Losberger De Boer delivers sports facilities that can be erected in a matter of weeks, but also offer endless flexibility for future needs and expansions. Our modular buildings can be designed to comply with the Eurocode (Bouwbesluit) and can be used for decades. Thanks to the longevity and flexibility of our structures, we can always provide you with a future-proof sports facility.

Why utilize modular construction for sports and padel halls?

- **Rapid construction:** From planning to completion, we ensure your sports hall is operational in weeks, significantly less time than traditional construction methods require.
- **Longevity and strength:** Compliant with global standards, our structures withstand environmental stresses, serving communities for decades. We can offer rapid delivery without compromising quality or durability.
- **Versatility:** Tailored to any sport or activity, our halls are designed to be fit for expansion, relocation, or repurposing at all times, meeting evolving community demands.
- **Sustainability:** Emphasizing eco-friendly construction, our buildings are composed of 95% recyclable materials, with options for both rental and purchase that can include solar panel installations, offering you a viable and sustainable alternative to traditional construction.

Discover the future of sports facilities with modular construction. This method is efficient, flexible, and environmentally friendly, allowing us to build sport halls that are not only sustainable but also easily adjustable to new developments and changing needs. This ensures lasting, future-proof solutions for every club or community.

Multifunctional sports hall, Heilbronn, Germany.

Multifunctional sports hall, Fimes, France.

Sports & Padel Halls

For every community need

Discover the flexibility of Losberger De Boer's modular sports halls and padel courts, designed for clubs and communities grappling with short to mid-term capacity needs in sports facilities. Our solutions adeptly serve temporary requirements during renovation phases, the establishment of new sports trends like padel, and the expansion of existing facilities, ensuring communities can swiftly and efficiently address their sporting infrastructure demands, while clubs can fulfill their capacity needs.

Renovation and temporary replacement

Effortlessly maintain community sports activities with our modular halls during the renovation of existing facilities. Designed for quick assembly, our structures ensure no interruption to planned events, communal activity programs, training sessions and matches. If you have some free space, we can deliver a temporary sport hall that is designed to meet the needs of your community, or members.

This way, you can ensure that teams and sport enthusiasts will always have a home, even when the current facilities are temporarily unavailable. Sport and sport clubs are crucial for community well-being and promoting a healthy lifestyle. Our buildings ensure that facilities can stay open during renovations or rebuilds.

Embracing padel's growth

With padel's rapidly rising popularity, we can help you create dedicated padel courts. Our modular solutions provide a swift response to the growing demand, ensuring communities can enjoy this emerging sport year-round. Over the past years, we have built several padel courts for multiple clubs, towns and cities.

How modular construction benefits your community

- **Quick assembly:** Our modular sports facilities are operational within weeks, significantly reducing construction times. This agility allows municipalities to quickly respond to emergencies or unforeseen developments, such as fire or structural issues, ensuring minimal disruption to community sports activities.
- **Adaptability:** Designed for both short and long-term use, our structures can evolve with your community's needs, offering possibilities for expansion or relocation. This flexibility is crucial if a sports club expands or a new sport becomes popular, allowing for adjustments in facility use, including additional space for changing rooms or offices and adapting the facility for different sports.
- **Quality and durability:** Constructed with top-grade materials and adhering to strict safety standards, including compliance with the Eurocode, our sports facilities ensure a safe environment for all users, guaranteeing the longevity and resilience of each structure.

Cases

Showcasing a few of our sports facility solutions

Two indoor padel courts for Mont-Saint-Aignan

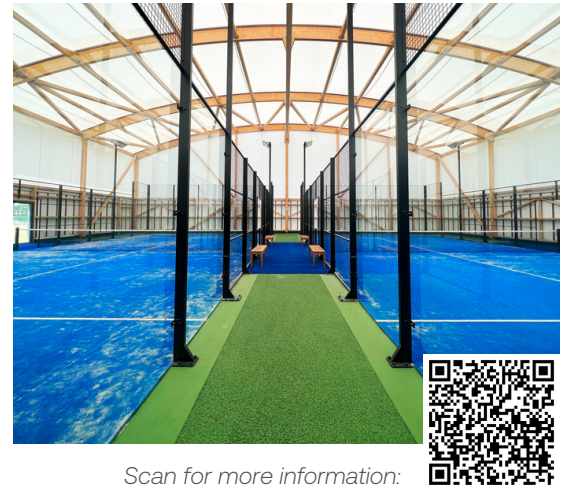

Overview: Losberger De Boer delivered a 650m² Ecosport building featuring two indoor padel courts for Mont-Saint-Aignan, France, focusing on eco-friendly construction.

Challenge: The town required modern, sustainable sports facilities to accommodate the growing popularity of padel.

Solution: Utilized locally sourced laminated timber and biobased materials for the roof, ensuring sustainability and optimal playing conditions through natural light.

Outcome: The project successfully integrated eco-conscious design with community sports needs, enhancing Mont-Saint-Aignan's recreational offerings.

Building time: 7 weeks

4 Indoor Tennis Courts for the Claude Bernard University in Lyon

Overview: A cost-effective, high-quality finish indoor tennis courts hall was constructed to meet the demands of the Claude Bernard University Lyon 1 for year-round play.

Challenge: Indoor tennis courts that could enable official competitions, with specific requirements to stand out from an overly industrial aesthetic.

Solution: The building was insulated on the roof and around the perimeter. Moreover, an anti-graffiti treatment was applied to the entire perimeter at a height of 3 m and digital printing was used on front gable.

Outcome: The tennis hall was completed in just 5 months, providing an energy-efficient, visually appealing facility that supports the University's activities and branding.

Building time: 5 months

Temporary sports hall for the city of Hamm

Overview: Losberger De Boer installed a 450m² aluminum hall in Hamm, Germany, as a temporary sports facility due to the deteriorating condition of the existing Ferdi-Hübner-Halle.

Challenge: The city needed a high-quality, quickly available solution to avoid disrupting community sports programs.

Solution: The hall was equipped with a special sports floor, impact walls, and essential amenities without windows to enhance energy efficiency and avoid glare.

Outcome: This temporary solution ensured uninterrupted access to sports facilities, underlining the hall's adaptability and Losberger De Boer's capability to meet urgent community needs.

Building time: 3 months

What it is like to work with Losberger De Boer

Losberger De Boer is one of the world's leading suppliers of temporary and permanent space solutions. Our structures and buildings are in use all over the world, functioning as sport halls, school buildings, refugee shelters, and airport terminals, among others.

So why would you choose to work with Losberger De Boer?

A Century of Expertise: As a world-leading provider of modular space solutions, Losberger De Boer blends traditional values with innovation and contemporary technologies. Our rich history since 1919 underscores our reliability and experience.

Certified Production Process: Quality and reliability are the basis of everything we do. Our production facility in Germany adheres to strict quality and safety standards, ensuring the safety of everyone who enters a Losberger De Boer building. Our products are developed to meet all relevant safety requirements and are designed for durability.

Complete Chain Control: From design to production, and from installation to maintenance, we do everything in-house. This way we can be 100% sure we can adhere to the highest quality standards and we can offer you the guarantee that your sports facility will be delivered in time.

Turnkey delivery: We are your one-stop shop for sports facilities. Together with our trusted partners, we can provide you with the turnkey delivery of a sports facility that includes amenities like sports floors (including markings), deflector walls, roof & wall isolation, dressing rooms, sanitation, storage space for materials, office space, lighting, heating & air conditioning, fire alarm system, and so on.

Reliable Delivery: With global capacity and local presence, we assure rapid deployment and installation, ensuring your project meets its deadlines. Over the last years, 99.2% of all our material deliveries have been in time.

Choosing Losberger De Boer is choosing peace of mind, knowing that:

- ✓ Every detail is taken care of
- ✓ We will guide you every step of the way
- ✓ Your building is safe and suitable for long-term use
- ✓ Your facility will be delivered on time

Committed to your success
